

CRYSTAL 2.0

Crystal Lens Technology changes everything.

You won't believe your eyes.

Crystal Lens
Technology

SEE
WHAT YOU
CAN DO

Crystal Lens Technology

True color vision
directly when welding.

With Crystal Lens Technology you see as a welder the joining. How the weld pool melts, how the weld seam is created. You can see how the filler material is immersed in the welding pool and gain complete control over your work.

Crystal Lens Technology, CLT, offers you a brilliant vision, like through a window pane. Crystal clear. Thanks to optrel ShadeTronic you will always have the right protection level.

Optrel revolutionises the welder's work. Crystal Lens Technology changes everything.

Protection

Superior visibility before and during welding dramatically increases your safety at work. No stumbling. No unintentional contact with dangerous workpieces. Fewer injuries. Perfect all-around safeguard.

Comfort

The crystal 2.0 helmet makes previous occupational safety a worry of the past. The helmet is there, but it does not impede your work. You can work with ease as if you were not wearing it at all. Like all optrel helmet, the crystal 2.0 is one of the lightest welding helmets available, weighing just one pound.

Efficiency

Thanks to CLT, you can clearly see where the weld needs to start and where it ends. You can see grains and marks on the workpiece during welding. No more annoying interruptions to check the position of your welding torch.

View with an industry standard auto-darkening filter (limited color spectrum and strong darkening)

Color spectrum

Vision with Crystal Lens Technology (natural color spectrum and minimal darkening)

Color spectrum

Reduces the risk of accidents and improves occupational safety.

Leaves you less tired and ensures a more pleasant work day and better work results.

Clear vision boosts performance by up to 30% due to fewer work interruptions, superior welding results and less rework.

optrel crystal 2.0

The enlightenment in welding.

Welding helmet and transparent visor in one

With the **crystal 2.0**, optrel for the first time offers a welding helmet equipped with the new CLT auto-darkening technology. This gives you a visual impression comparable to that through a window pane. In fact, 92% of the visible color spectrum corresponds to that of a neutral window pane. This also has a positive effect on the brightness level. With a protection level of 2.0 in it's light state, you can see your working environment as if you were not wearing an auto darkening lens at all.

ShadeTronic including protection level 2/4 -12

Light state

Inactive mode and grinding mode

ShadeTronic Range

for all important work sequences

Adjusts automatically to the changing light conditions of the current welding method. automatic adjustment up to shade level 12!

Adaptive protection level control sets the right protection level automatically in a range between 4 and 12. This is ensured by an additional brightness sensor which measures the intensity of the welding arc. This means that you are perfectly protected at all times, no matter what parameters you are welding with. Manual adjustments are no longer necessary.

The full-featured welder's helmet. optrel crystal 2.0

optrel's new flagship is packed with innovative technologies that make your work easier and more convenient.

Crystal Lens Technology with light State 2.0

Now you can clearly see what happens before, during and after welding.

Heat reflective paint

Helping you keep a cool head at all times.
(silver version only)

ShadeTronic Protection level 4 to 12

The welder's helmet automatically adapts to changing light conditions.

Sensor slide

Set the sensor detection angle individually to suit your requirements.

FadeTronic

You can always remain relaxed even in case of fast lighting changes.

Patented eccentric

Positions the helmet optimally on your head – with just one twist.

Sensitivity control

Adapts the helmet to your environment and requirements.

Comfort headband

Guarantees optimal weight distribution and is easy on the neck.

Grinding mode

The brightest vision during grinding work ever to be offered by a welder's helmet.

3-year warranty after registration

WARNING:
Welding with the crystal 2.0 is addictive

A totally different welding experience.

optrel crystal 2.0

Technical data

Description	Fully automatic welder's helmet with very bright and clear vision, both before and during welding (light level 2.0 in combination with Crystal Lens Technology).		Dimensional stability	Welding mask:	up to 220 °C
				Front cover lens:	up to 130 °C
Protection levels	inactive	Access level 2.0	Eye protection	Ultraviolet/infrared protection: Maximum protection over the entire protection level range	
	active, manual:	Protection levels 4-12	Operating temperature	-10°C to + 70°C/ 14°F to 158°F	
ShadeTronic	Automatic protection level regulation over the protection level range 4-12M with individual calibration option of ± 2 .		Storage temperature	-20°C to + 80°C/ -4°F to 176°F	
Voltage supply	Solar cells, 2 lithium button cells (CR2032)		Gross weight	497 g/17.0 oz	
Sensor system	Three sensors		Areas of application	All electrical welding processes: Electrode welding (Stick Welding, SMAW) / MIG/MAG (Metal Shielded Arc Welding, GMAW) / GMAW High Performance Welding / Filler Wire Welding / TIG Welding (TIG, GTAW) / Plasma Welding / Plasma Cutting / Grinding in Grinding Mode <i>Not suitable for gas and laser welding!</i>	
Sensitivity	Continuously adjustable, new with "Super High" sensitivity		Standards	CE, ANSI, EAC, fulfils CSA	
Switching time	Light to dark: 0.100 ms at room temperature 0.070 ms at 55°C Dark to light: 0.1 s to 2.0 s (including FadeTronic)		Warranty	from date of purchase: 2 years for manufacturing and material defects, 6 months for battery	
Classification EN379	Optical class:	1	Warranty extension	1 year additional (battery excluded) for online product registration within the first 6 months (from date of purchase) on optrel.com/register	
	Scattered light class:	1			
	Homogeneity class:	1			
	Angle dependence class of light transmittance:	2
